

# NEW Elkay Energy Management

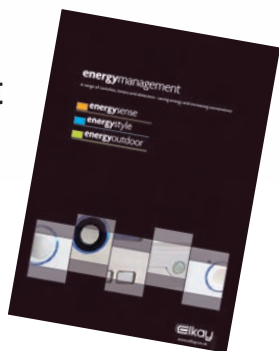

**Intelligent energy management at your fingertips**  
**The new, innovative and intelligent energyrange of products from Elkay.**

The **energyrange** includes three different product categories - **energysense**, **energystyle** and **energyoutdoor** which not only give better control of lighting, heating and other load applications, but also offer enhanced safety and security benefits.

Offering unique features and increased functionality to the highest design specifications, the new range is tested and certified to BS EN60669.

For ease of use, Elkay' has designed all of its products to be easily installed, with a minimum of disruption to new or existing builds. The **energyrange** can, more importantly, be retrofit into existing commercial and domestic buildings, without the need for re-wiring.

For a complete range of Energy Management Products just ask for our catalogue or visit [www.elkay.co.uk](http://www.elkay.co.uk)

**energysense**  
**energystyle**  
**energyoutdoor**

During the development of the innovative **energyrange**, Elkay has been granted, several patents for new technologies including the unique method of switching 16 Amp current regardless of load type, a market first for time delay switches.

With rising energy costs and increasing concerns about the environmental impact of energy consumption there is a need to find and implement practical measures to save energy and limit carbon emissions. All of these issues are addressed by the **energyrange**.

Whatever the installation, the new **energyrange** from Elkay Electrical provides a practical and stylish way of saving energy in domestic or commercial buildings, without costing the earth.

## carboncalc

The new carboncalc from Elkay is a simple but highly effective way of calculating energy use and cost, both in terms of monetary cost and carbon emissions.

Part No. C-CALC
